'Thermilate UK Ltd' is no longer distributing genuine 'Insuladd Products'

Dear Valued Customers, Resellers and Concerned New or Potential New Clients:

On May 15th, 2007 Tech Traders, Inc. and Thermilate entered into a supply and distribution Agreement in which Thermilate purchased Tech Traders, Inc. proprietary "Insulating Additive and Paint Products" and was authorized to repackage this product under the name "Thermilate" for sales in selected international markets. These products consisted of the NASA developed and Patented product... (1) Insuladd Insulating Additive (2) E-Coat Elastomeric Paint (3) RBC Radiant Barrier Coating (4) Thermal Block interior and exterior primer/paint. As part of this Agreement Thermilate was authorized to use Tech Traders, Inc. marketing materials and images which included to name a few, the name E-Coat, NASA testimonial as the originator of the Insulating Additives, Test Data, Thermo graphic images and much more.

On 10-1-09 Tech Traders Inc. and Thermilate discontinued the above mentioned agreement. Tech Traders, Inc. based on the many letters and inquiries received from the market place felt obligated to set the record straight. While we wish Thermilate UK Ltd the best of luck in its new endeavors we need to make sure that our "Customers, Resellers and Concerned New or Potential New Clients" understand that THERMILATE UK LTD is no longer a distributor of INSULADD products. THERMILATE UK LTD no longer has the right to use our products names, marketing and testing data, and our endorsement's of NASA. Please also be advised that THERMILATE UK LTD does not have our INSULADD technology and any products that they market do not contain INSULADD technology nor have they been manufactured by Tech Traders Inc. We ask our customers to verify the source of testing and claims made on products that are not Tech Traders , Inc. – Insuladd authentic products.

Sincerely,

David Page

President and CEO
Tech Traders, Inc.
